ABOUT US

MAVI DENIS GIYIM TEKSTIL is a vertically integrated apparel manufacturer focused on woven and optional jersey womenswear collections. With more than 20 years of industry expertise, we collaborate with fashion brands across Europe and international markets to develop and produce high-quality garments. Our strength lies in combining technical know-how, flexible manufacturing, and a customer-oriented approach. Whether developing seasonal collections or producing private label programs, we are committed to delivering excellence through quality craftsmanship, responsible communication, and on-time performance.

WHY CHOOSE M&A DENIS

Industry Expertise

Over 20 years of experience in the apparel and textile industry, serving local and international customers with consistent quality and reliability.

Customer-Oriented Approach

We listen, understand, and adapt to our customers' needs, ensuring that every project is tailored to their expectations and brand identity.

Exclusive Partnerships

Each customer receives dedicated attention, confidentiality, and personalized service throughout the entire development and production process.

MANUFACTURING EXPERTISE

Product Development Excellence

From design interpretation and pattern making to sampling and production, we ensure every garment meets the required specs and quality standards.

Skilled & Experienced Team

Our qualified professionals manage every stage of production with precision, expertise, and attention to detail.

Quality Without Compromise

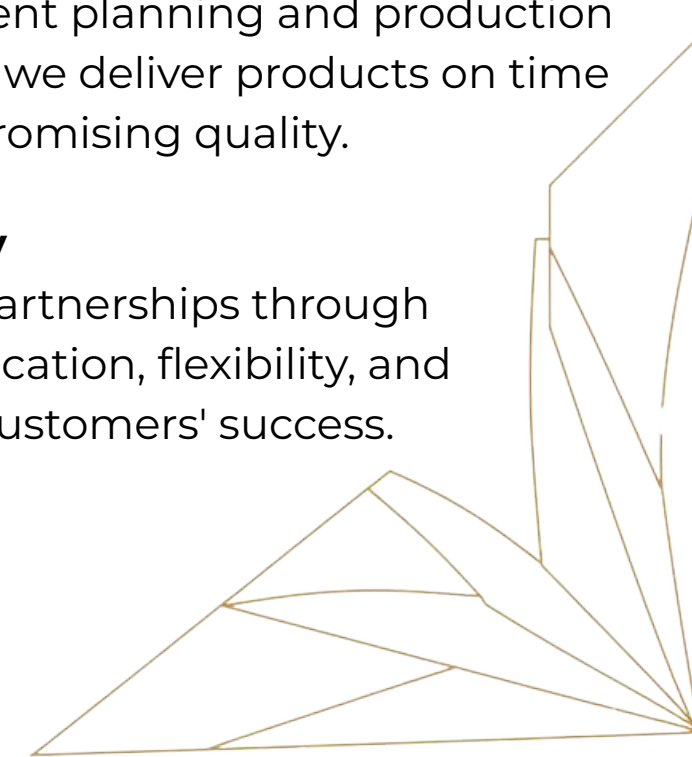

We carefully monitor every process to ensure superior workmanship, accurate fitting, and consistent product quality

Reliable Delivery

Through efficient planning and production management, we deliver products on time without compromising quality.

Trust & Transparency

We build long-term partnerships through responsible communication, flexibility, and commitment to our customers' success.

MANUFACTURING EXPERTISE

More than two decades of expertise
in apparel manufacturing.

QUALITY ASSURANCE

Quality-driven processes at every
stage.

WOMENSWEAR SPECIALIST

Focused on contemporary woven
and optional jersey womenswear
colls.

ON-TIME DELIVERY

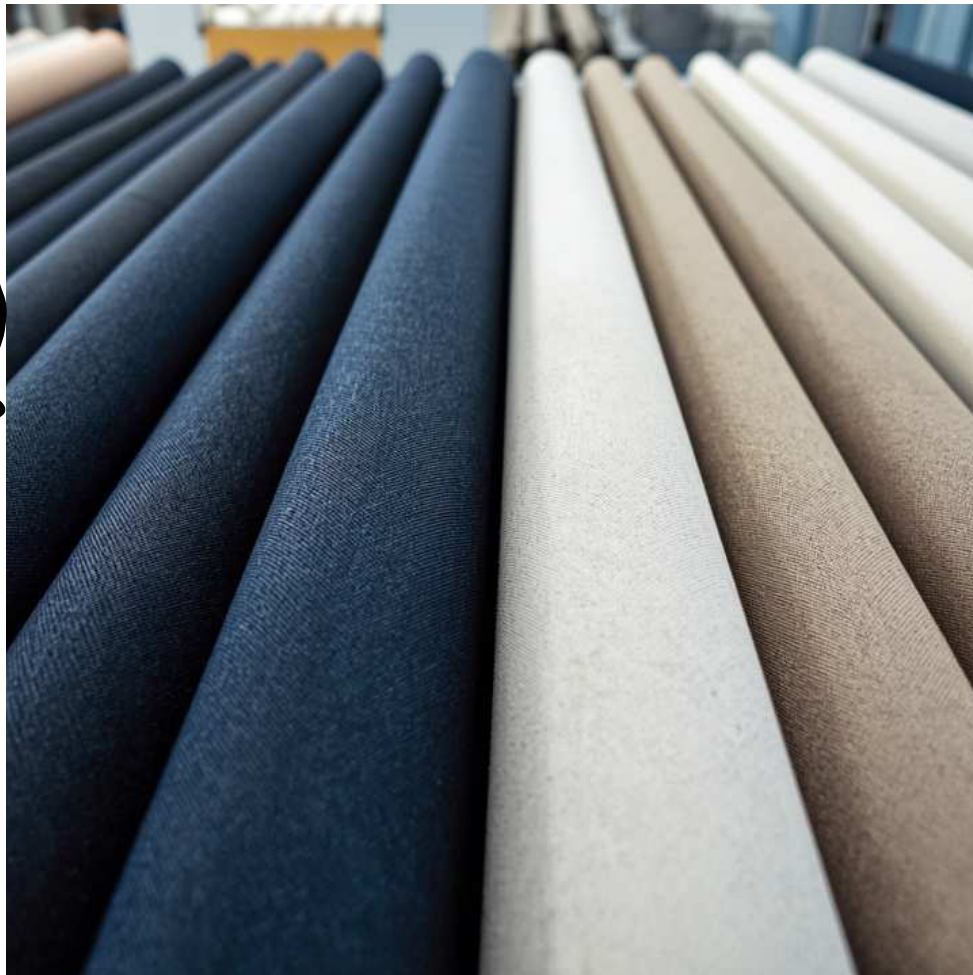

Efficient planning and dependable
delivery performance.

DEDICATED PRODUCT DEVELOPMENT

From concept to sample and final
production

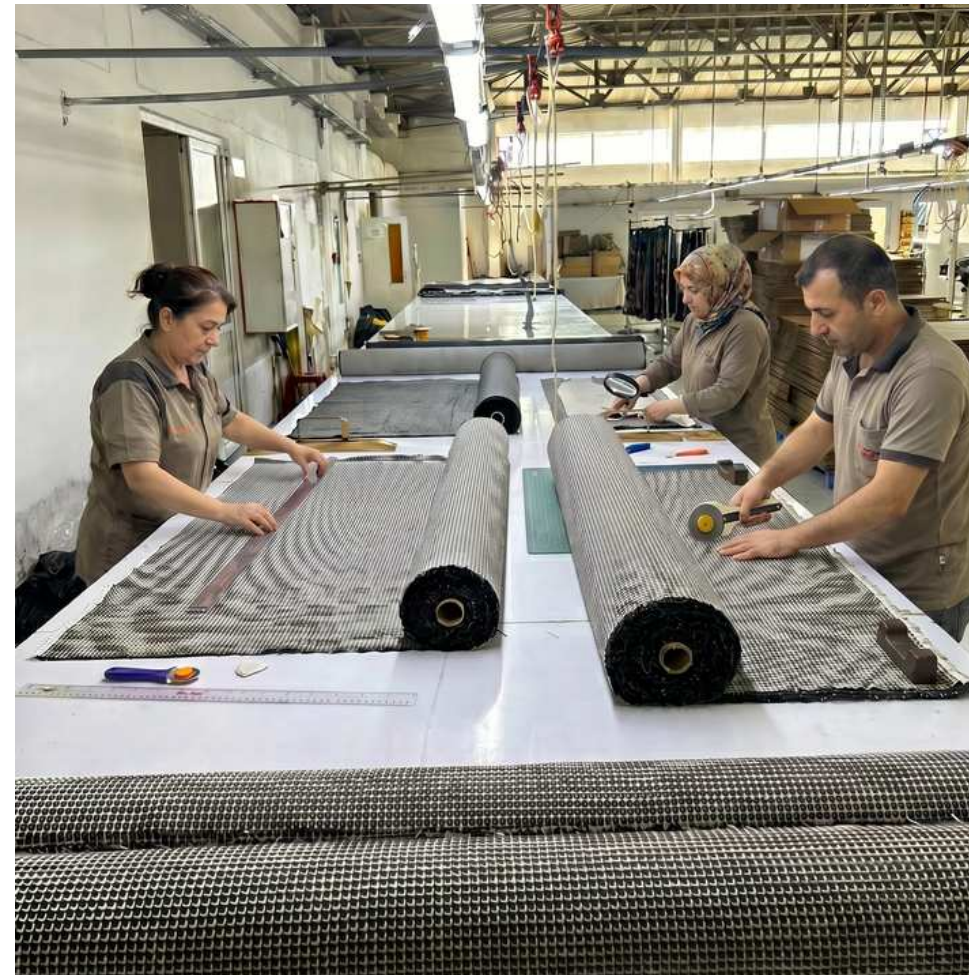

DEDICATED SERVICE

Clear, responsive, and professional
customer support.

FABRIC SOURCING

We source premium-grade fabrics from certified global&local suppliers, ensuring consistent quality, colorfastness, and compliance with international textile standards for every order.

CUTTING PRECISION

Our cutting system ensures flawless pattern alignment across all production volumes while minimizing fabric waste through its high precision.

FINISHING EXCELLENCE

Every garment undergoes rigorous finishing processes including quality stitching inspection, pressing, and packaging to meet the highest luxury apparel standards before dispatch.

VISION & MISSION

OUR VISION

To be a globally recognized premium apparel manufacturing partner, setting the standard for excellence in quality, craftsmanship, and innovation. We aspire to build long-term relationships with the world's leading fashion brands by delivering unmatched precision, reliability, and value at every stage of production.

OUR MISSION

To provide world-class apparel manufacturing solutions through our unwavering commitment to skilled craftsmanship and quality. We are dedicated to meeting the evolving needs of our international partners with speed, transparency, and sustainable practices.

Days - Yarn Dye

Delivery lead time for
yarn-dye fabrics

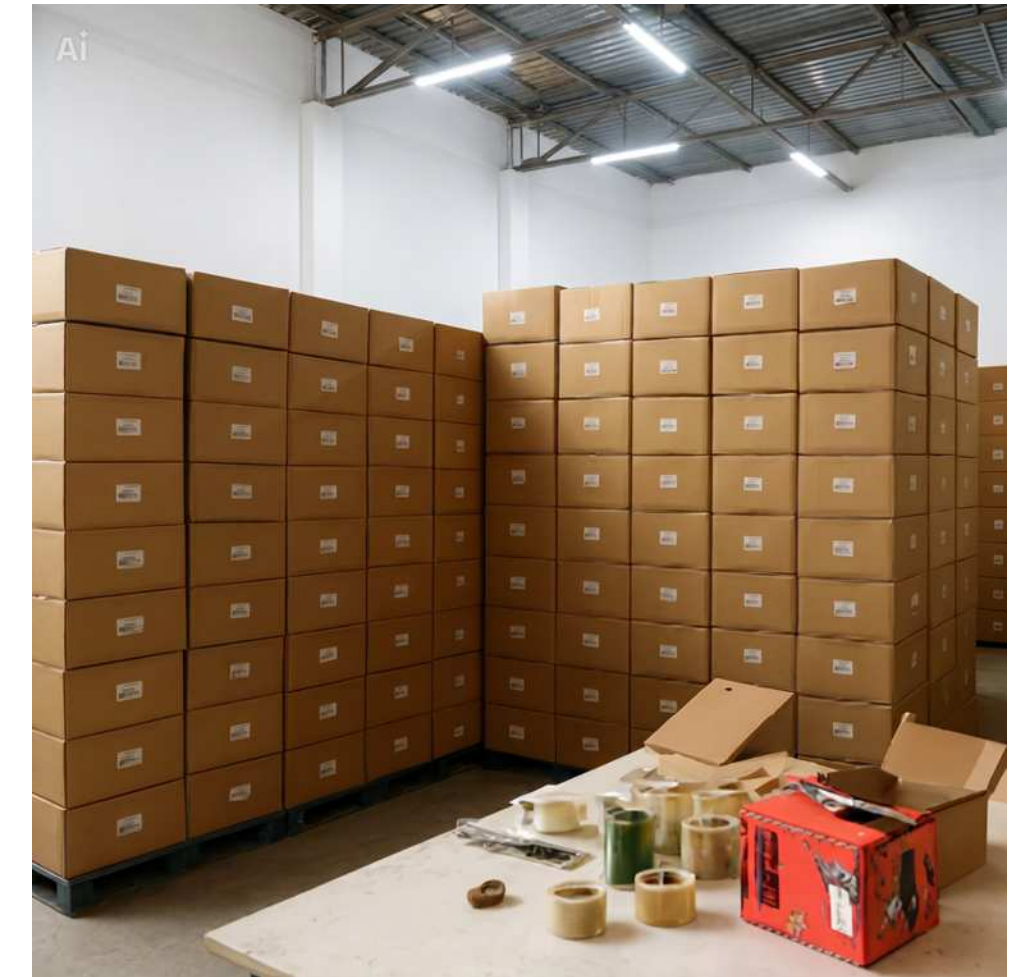

DESIGN & CONSULTATION

From concept to pattern, our expert design team collaborates closely with clients to develop garments that meet precise specifications, quality standards, and seasonal trends for international markets.

MANUFACTURING

Full-cycle apparel production featuring machines tailored to your needs, skilled craftsmanship, and meticulous quality control—we deliver premium-quality garments at scale with consistent excellence and on-time delivery.

LOGISTICS & DELIVERY

End-to-end logistics management including packaging, labeling, customs documentation, and global shipping coordination — ensuring seamless, timely delivery to destinations worldwide.

OUR PROCESSES

From concept to delivery, every stage of our manufacturing process is carefully managed to ensure precision, quality, and on-time execution.

OUR PROCESSES

01 — DESIGN & DEVELOPMENT

Technical sketches, fabric selection, and pattern making are completed in close collaboration with the client to ensure the design vision is fully realized before production begins.

02 — SAMPLING

Prototype samples are crafted with precision. Fit samples, pre-production samples, and approval samples are provided at each stage for client sign-off and quality assurance.

03 — PRODUCTION

Full-scale production begins once the final sample has been approved. Cutting, sewing, and assembly are carried out by our experienced staff throughout our production facility.

04 — QUALITY CONTROL

Rigorous inline and end-of-line inspections ensure every garment meets international quality standards. Final audits are conducted before packaging and shipment.

STITCHING TECHNIQUES

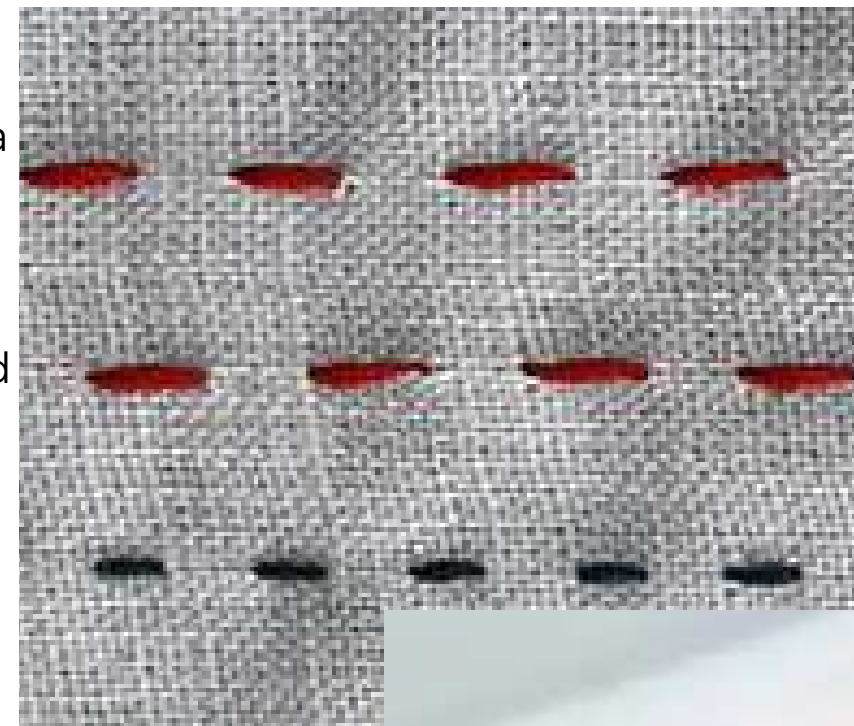

DOPPELSTEPPSTICH (Twin Needle Lockstitch) | High-precision double-needle stitch used for parallel seam construction and decorative topstitching on woven and knit fabrics. Provides enhanced seam strength, uniform stitch alignment, and a premium tailored appearance. Common stitch spacing: 2.5–4.0 mm between needles.

DOPPELSTEPPSTICH ZICKZAG (Decorative Zigzag Stitch) | This stitch is used to add a unique visual element to various areas of products designed for decorative reinforcement. Whether for sportswear or elegant garments, this stitch gives them a distinctive look and makes them more appealing.

AMF STICH (Punto Original) | Authentic hand-applied pick stitch used in high-end tailoring for lapels, collars, and pocket edges. Creates a subtle, irregular stitch effect that mimics traditional hand sewing, adding a refined and luxury craftsmanship detail to garments.

AMF STICH (Punto Fake) | Machine-produced imitation of hand pick stitching, designed to replicate the visual appearance of AMF tailoring detail. Provides a consistent, uniform decorative edge stitch while maintaining production efficiency and cost-effectiveness for mass production garments.

BABY OVERLOCK | Narrow edge finishing stitch used for lightweight and delicate fabrics. Produces a fine, compact overedge seam that prevents fraying while maintaining softness and minimal bulk. Ideal for chiffon, silk blends, and hems and edges.
